

Women Physicist Luncheon

Tuesday, July 16 from 12:15-1:45 PM

Meet the panelists and moderator for the Women Physicists Luncheon. This year's program will focus on early, mid and late career physicists explaining strategies that worked; include risk taking, making allies and advocates, mastering your social media presence, maximizing your collaborations, getting that first R01 and putting yourself first. The panel discussion will be led by Julie Pollard-Larkin, who will be fostering discussions (talk show host style) in a very relaxed and open atmosphere. We hope you can join us.

Erin Angel
Medical Affairs Leader, CT
Canon Medical Systems USA, Inc.
